

PATRYCJA PANASIUK

Frontend Developer

Profile

A frontend developer with a UX twist – I craft sleek interfaces, write clean and structured code, and have a soft spot for reusable components. Skilled in **Next.js** and **TypeScript**, I navigate both international and interdisciplinary teams with ease. Or, as the UX designer I worked with put it: **‘Not your average frontend dev!’** Also, mildly addicted to **ChatGPT** and **Claude Dev** – but let’s call it ‘leveraging AI for efficiency’ 😊

EDUCATION

Full Stack Developer
School Of Applied Technology, Sweden
2020–2021

Bachelor of Civil Engineering
Lublin University of Technology, Poland
2013–2019

Bachelor of Landscape Architecture
Lublin University of Life Sciences, Poland
2012–2016

STACK

- | | |
|-----------------|----------------|
| JavaScript ES6 | Also: |
| TypeScript | Node JS |
| React, Redux | GraphQL |
| Next JS | GSAP |
| HTML, CSS, SCSS | Vercel, Heroku |
| Tailwind, MUI | CI/CD |
| Figma | |

LANGUAGES

- | | |
|-----------------|--------------|
| Polish – native | German – A1 |
| English – C1 | Spanish – A2 |

SKILLS

- | | |
|----------------------|------------|
| problem solving | teamwork |
| critical thinking | creativity |
| detail-oriented | scrum |
| user-centered design | |

Experience

- 2024 – present
GTV, Warsaw, Poland
Frontend Developer
 - Building a **B2B app from scratch**, actively participating in **technology and tool selection**
 - Developing a **complex configuration tool** based on a dynamic form that calculates results using predefined algorithms
 - Implementing **form handling with React Hook Form** and **validation using Yup** for robust and scalable user input management
 - Implementing **multi-language support using React Intl** to handle localization efficiently
 - Creating **complex tables using TanStack**, ensuring high performance and flexibility
 - Showcasing and documenting **UI components in Storybook** for better reusability and consistency
 - Collaborating closely with a **Product Owner, UX Designer, and Backend Developer** to refine requirements and user experience
 - Working in an **Agile (Scrum) environment**—but hey, who doesn’t these days? 😊
 - Building the frontend using **Next.js, Tailwind CSS, and Redux** for efficient state management and performance
 - Integrating designs from **Figma**, ensuring a seamless and responsive UI
- 2023 – 2024
Performance Media, Warsaw, Poland
Frontend Developer
 - Developed a **B2C product application** for **Procter & Gamble**, allowing users to take a quiz to determine their hair type
 - Built the frontend using **Next.js, Redux, Tailwind CSS, and GraphQL** for a smooth and responsive user experience
 - Integrated **Contentful CMS**, collaborating closely with the CMS team to manage and deliver dynamic content
 - Focused on **SEO optimization**, ensuring high search engine visibility and fast page load times
 - Ensured seamless communication between the frontend, GraphQL API, and CMS, optimizing performance and content updates
 - Prioritized accessibility and user-friendly UI to enhance the customer experience

CERTIFICATES

2021 – Go Carrots
From vision to online business:
E-commerce

2022 – Accenture
Digital Skills: User Experience
<https://www.futurelearn.com/certificates/vg0pq2x>

COURSES

2021 – 2022 – FADO
Leadership training workshops

The entire program took 100 hours. It was divided into 5 practical modules: leader person, leadership communication, team leader, leadership tools and design tools. The course was designed to increase soft skills and working in a team.

I use these skills in my daily work with colleagues. It is easier for me to understand their behavior and to resolve possible conflicts.

Experience

- 2021 – 2023
SALT, Oslo, Norway (remote)
Software Developer Consultant / UX Designer
- Worked as Consultant in different projects, mainly as a **Frontend Developer and UX Designer** on [Noterat.io](#), a Swedish startup project
 - Built a **data-heavy application** in **React**, processing large datasets and visualizing them using **React Charts**
 - Designed and implemented **interactive data visualizations**, ensuring clarity and usability
 - Collaborated with a **non-technical Product Owner**, whose ambitious ideas often needed a reality check 🚀
 - Faced the challenge of **designing a color-rich application** while avoiding specific colors due to potential political associations
 - Navigated the additional challenge of working on a **Swedish-language application**, which sometimes felt like debugging both code and my Swedish skills at the same time 😊

Hobbies

travelling
(50 countries)

volleyball

indonesian
architecture

psychology

design

rock music
